

Afghanistan Ubuntu Loco Team Members Meeting

Code: AULT_003

Date: 10/02/2011 Thursday

Start-Time: 11:00 am

End-Time: 12:00 am

Place: ITCH-Meeting room

Attendants: Sadeq Zabihi, Mahjuba Jamiulahhmady, Hasen Islamy, Sayeda Nazary, Hamid Raza Zarsazan, Lalah Azar, Ali Ahmad Faqiry, Waheeda Hamkar and Anita Afzali.

The meeting was started by Sadeq Zabihi team leader of AULT. he said about the previous problem and had an overview about all the members' responsibilities and their tasks that they have done since last meeting.

Sayeda and Waheeda report about localization team where they had some advertising around the Internet and in other faculty in Herat University for gathering those who are interesting to localize Ubuntu for non technical peoples.

They have 12 persons that are going to help localization team they also said that they had tow meeting with them the first meeting was on January 12 of 2011 that they made the members familiar with the program that they must translate the packages with that and their second meeting was about twenty day later of the first meeting and they are translating the most necessary packages first of all.

Then the chance was given to the educational team, Lalah said that its nearly two months that they started some educational classes for faculty student with six teachers they also named some problems which they faced with that in the past days are no class for teaching, the next and important problem was that most of people are not familiar with Linux family there is the biggest problem that purports others to learn Ubuntu.

The customization team had a survey all around the faculty and asked every faculty's member for their necessary and usable softwares and made package repository for them so the first draft had some

problem and they solved the problem and released the second repository, these all were done on Maverick Meerkat.

IRC channels and forums was the next discussion during this meeting there were some problems that the IRC channels and forums were not activated so after some days these problems were solved by Ubuntu community and now both IRC channels and forums are ready to use.

After all these the social network team said that they are introducing Ubuntu and its facility around the Internet and inform all peoples for the latest and newest news of Ubuntu.
