Ubuntu is a Linux distribution based on Debian Linux. it serves as a full Linux operating system, focused on accessibility and ease of use.

**Total freedom of Computing**

Ubuntu Linux allows you to boot a complete operating system, completely safe from viruses, spyware and other security risks. Free to use without restriction. Browse the internet, create office documents, check email and play music and video.

**Install CD**

This distribution includes one CD, you can use the CD to install Ubuntu upon your hard drive, when installed Ubuntu is faster and more stable it also will allow you to upgrade and install new applications from the internet using Ubuntu's advanced package manager.

**LiveCD**

A LiveCD is a unique way of storing an entire operating system upon a CD, when inserted will boot the OS without harming the installed system but allow access to files upon that system. This is a perfect way to try Linux without the risk and time in installing a new operating system.
