Interim brandmark use only

ubuntu®

Ubuntu Brand Guidelines Introduction

We believe that everyone has the right to a high-quality computing experience. And we believe it should be free. Ubuntu is the best operating system in the world. It's fast, free and safe. More than an operating system, Ubuntu is at the forefront of a world-changing revolution that's gathering pace every day. A truly collaborative effort with freedom at its heart, Ubuntu is the result of a growing community working together to produce something extraordinary.

Why do we need guidelines?

A successful visual identity has to be consistent, recognisable and powerful.

The following guidelines should help all of us to create a distinct, professional visual identity that clearly communicates our brand values.

Please take some time to understand how to apply these guidelines correctly.

Ubuntu Brand Identity Guidelines Ubuntu core values

Our values

Ubuntu embodies freedom, and is collaborative, precise, and reliable.

Ubuntu Brand Guidelines The Logo 01

The logos

The logo is the most recognisable feature of any brand identity. Our new logos represent our core values.

Ubuntu Brand Guidelines The Logo 01

The Ubuntu logo
Ubuntu has grown up. We've revisited the circle-of-friends idea and evolved it. Our new Ubuntu logo has two parts: the word mark and the symbol.

- The word mark - We've designed a new font, which harnesses the core values of precision and reliability in particular. Given that the theme for the next five years is light, the preferred use of the word mark is white typography on a flat orange-coloured background.
- The symbol - The new symbol simplifies and sharpens the original circle-of-friends design. It's leaner, more refined and more contemporary. Wherever possible, the symbol should always appear as white on a flat orange-coloured background.

The Canonical logo
The new Canonical logo is smart, precise and focused. It is clearly linked to Ubuntu but equally clearly differentiated.

- The word mark - The Canonical word mark adopts the same font as the Ubuntu word mark, but uses capital letters. The preferred use of the word mark is white typography on a flat aubergine-coloured background.
- The new symbol plays on the ideas of Canonical being focused and targeted. These ideas strongly relate to our core values of reliability, precision and adroitness. Similar to Ubuntu, the symbol should always appear as white on a flat aubergine-coloured background wherever possible.

Ubuntu and Canonical: bridging the gap

A strong, purposeful and vibrant identity for Ubuntu and Canonical are central to our success. In the past, the distinctive look of Ubuntu lent itself well to pure community messaging, but it was hard to use the same approach for Canonical's commercial services. We needed to move away from a one-size-fits-all approach and define a clear, recognisable way to engage every audience.

Who are we talking to?

Ubuntu faces a unique – and welcome – challenge in appealing to a range of users. But these different users expect different things. We have developed a system which will help define the right look and feel for the right target audience.

A new approach
We have identified six of our core audiences and distilled them into three groups. Each group represents a different audience focus.

The audience spectrum
Before we produce any material, it should be clear where the audience emphasis lies on the scales between community and commercial, consumer and enterprise, and user and engineer. This will help us determine which colours and designs to use.

Ubuntu Brand Guidelines Who are we talking to 01

General design rules
Community / Commercial
Orange / aubergine

Consumer / Enterprise
Light aubergine / dark aubergine
Less closely spaced dots / more closely spaced dots

User / Engineer
Closely spaced dots / widely spaced dots

Ubuntu Brand Guidelines The palette explained 01

A vibrant palette

Colour makes a brand instantly recognisable. We like to think our colour palette is simple, effective and striking.

We have introduced a palette which includes both a fresh, lively orange, and a rich, mature aubergine. The use of aubergine indicates commercial involvement, while orange is a signal of community engagement.

Ubuntu Brand Guidelines The palette explained 01

The palette explained

Our new palette includes:
Orange - For a community focus. Shades only vary according to hierarchy of information within tables and diagrams.

Light and dark aubergine - For a consumer focus. Lighter shades indicate more of a consumer focus, darker shades indicate more of an enterprise focus. Warm grey - For balance. Orange and aubergine together are very striking. The addition of warm grey softens the combination of orange and aubergine and provides a bridge between the two. Cool grey - For typography, particularly body copy. Black can be quite harsh in combination with aubergine, but grey delivers more balance while still being legible. White - For a clean, fresh and light feel. Black - For typography and black-and-white versions of the brandmark.

We have introduced a colour balance chart which shows the proportional use of colour for materials depending on where they sit on the audience spectrum.

At one end of the scale, where the work is dominated by the community, the emphasis is on a fresh palette, the use of white and orange, and warm grey for balance.

At the other end of the scale, where the work is more refined and grounded, with much more emphasis on aubergine as the core colour.

For specific examples, please see pages x to x.

Ubuntu Brand Guidelines Connecting the dots 01

Connect the dots

Widely spaced dots - On the user-engineer spectrum, we took inspiration from graph paper and engineering blue prints. When you see widely spaced patterns of dots, the content is more engineering-oriented than user-oriented.

A large area of widely spaced dots on the page signal engineer orientation only.

A small set of widely spaced dots can be used as a flourish to add texture to the page.

For specific examples, please see pages x to x.

Ubuntu Brand Guidelines Connecting the dots 01

Connect the dots

Widely spaced dots - On the user-engineer spectrum, we took inspiration from graph paper and engineering blue prints. When you see widely spaced patterns of dots, the content is more engineering-oriented than user-oriented.

A large area of widely spaced dots on the page signal engineer orientation only.

A small set of widely spaced dots can be used as a flourish to add texture to the page.

For specific examples, please see pages x to x.

Ubuntu Brand Guidelines Made to measure 01

Made to measure

Our sliding-scale approach helps us to target different audiences more effectively. We can convey subtle collaboration between community and corporate groups, or work which is aimed at engineers and enterprise-focused developers. This means that we can publish content that spans the full range of audiences, and we can start the design process with the right visual cues in mind.

Example audiences

- Canonical to ODE - Emphasis on aubergine. Widely spaced dot patterns.
- Canonical to CIDs - Emphasis on aubergine. Closely spaced dot patterns.
- Canonical to the community - Emphasis on orange but with aubergine presence.
- Closely spaced dot pattern - used sparingly.
- Internal audience eg. Some Hands materials - Emphasis on aubergine with an orange flourish. Both widely spaced dots and closely spaced dot should be used here. Artwork examples will be available.

Ubuntu Brand Guidelines Producing new work 01

Producing new work - A checklist

Whenever you're about to create a new piece of work, please consider the following.

Presentations
We've created a presentation template to help you use the brand consistently. (see pages x to x)

By following these guidelines, you should be able to create simple, effective and dynamic presentations.

Ubuntu Brand Guidelines Producing new work 01

General tips
Avoid overcrowding slides with too many words or images. Keep them simple.
Do not use too many different styles of chart. Try to create a uniform look to the presentation and the information will be much easier for the viewer to understand.

Checklist

- Where does the piece of work fit on the audience spectrum?
- Am I using the right colour palette?
- Am I using the most up-to-date master template?
- If I am using photography, is it in the right style?
- Are the charts and diagrams consistent?
- Am I using the right font?
- Am I using the right brandmark?
- Am I using the right tone of voice?

Please see pages x to x for detailed specs.

Ubuntu Brand Guidelines Charts and diagrams 01

Charts and diagrams

Charts and diagrams are a great way to present complex information in a clear way. Our charts and diagrams make full use of our new dot-pattern textures and our new colour palette.

Dot-pattern texture • For backgrounds
• Under title headings

Colour palette • Orange
• Aubergine
• Warm grey
• Cool grey

Ubuntu Brand Guidelines Charts and diagrams 01

General tips
 Don't overcrowd the chart or diagram. Think about what you need to say and be selective about the information you need to communicate.

Use pictograms where necessary (see examples on pages x to x and visit the pictogram library at ...).

Use the correct typeface and colour palette. Use the audience spectrum to identify the colours you should be using. Please consult the guide detailing how to create charts and diagrams on pages x to x.

Checklist
 1. Where does the diagram/chart sit on the audience spectrum?
 2. Am I using the right colour palette?
 3. Are the charts and diagrams consistent?
 4. Am I using the right font?
 5. Am I using the right landmark?
 6. Am I using the right tone of voice?

Please see pages x to x for detailed specs.

Ubuntu Brand Guidelines Photography 01

Photography

Photography is a good way to help us contextualise and humanise content. We use 'product' photography and 'people' photography. We're more likely to 'product' photography in relation to ubuntu and 'people' photography in relation to Canonical. Our photography uses an aubergine duotone effect.

Ubuntu Brand Guidelines Photography 01

General tips
 • We use duotone and tritone image treatments with colours taken from our palette.
 • We can artificially highlight part of an image with orange or aubergine.
 • When signalling community involvement, we use an orange-and-black duotone.
 • When signalling Canonical involvement, we use an aubergine-and-black duotone.
 • In both cases, we can accent, or highlight, a portion of the image using either orange or one of the lighter shades of aubergine.
 • We can add a dot-pattern flourish to signal Canonical ownership and re-enforce the brand.

• Text on photographs should be white, either directly on the darker portion of the image, or on a dark swatch of colour placed on to the image.
 You can find approved photographic images from our photo library at ...

Checklist
 1. Where does the content fit on the audience spectrum?
 2. Am I using the duotone correctly?
 3. Am I using the right text colour?
 4. Have I cropped the image in the right way?
 5. Source images from our photo library at ...

Please see pages x to x for detailed specs.

Ubuntu Brand Identity Guidelines Our assets

The image shows the Ubuntu logo in white on an orange background, followed by the Ubuntu Sans typeface in various weights and colors (orange, aubergine, warm grey, cool grey). Below the logo are several icons representing different Ubuntu features like a head with gears, a terminal, and a person.

Ubuntu Brand Identity Guidelines The Ubuntu brandmark 00

The brandmark

Copy to come...

Ubuntu Brand Guidelines The brandmark 01

THE UBUNTU BRANDMARK
 The Ubuntu brandmark captures the precise and reliable qualities of the brand in a simple forward symbol and wordmark.
 It is made up of a custom designed font (wordmark), carefully spaced with a re-drawn "Circle of Friends" placed within a roundel.

Consistent use of the Ubuntu brandmark is essential in creating a unified brand identity. The master brandmark is supplied as artwork and should never be altered, distorted or re-created in any way.

Ubuntu Brand Guidelines The brandmark 02

BRANDMARK ELEMENTS
Wordmark
 Logotype created using our unique, custom designed font with each letter carefully spaced for the correct feel and maximum legibility.
Circle of Friends
 A crafted graphic symbol that represents freedom, collaboration, precision and reliability.

Roundel
 Circular holding device for the Circle of Friends for added precision and clarity.
Registered Trademark
 The Ubuntu word and associated brandmarks are Registered Trademarks. When using the Ubuntu brandmark, please include the ®, unless the size or location of the brandmark or reference makes this impossible or detrimental to the look and feel, in which case you should identify the brandmark as a "Canonical"™. The styling is an aubergine and aubergine play "Ubuntu" is a registered trademark of Canonical Ltd.

WORDMARK
REGISTERED TRADEMARK

Ubuntu Brand Guidelines Circle of Friends 03

THE CIRCLE OF FRIENDS
 The Ubuntu brandmark is made up of the Ubuntu wordmark and the Ubuntu symbol. This symbol is called the Circle of Friends.
 It has been carefully re-drawn and positioned within a roundel for precision and added clarity.

Ubuntu Brand Guidelines Colourways The brandmark 04

AVAILABLE COLOURWAYS
 The brandmark is supplied as Pantone and CMYK versions for print, and HEX versions for web. It can only be used on one of the Ubuntu colours, shown on page 14.
 Never change any of the colours in the brandmark. For detailed colour specifications refer to page 14.

Ubuntu Brand Guidelines Colourways Circle of Friends 05

AVAILABLE COLOURWAYS
 The Circle of Friends is supplied as Pantone and CMYK versions for print, and HEX versions for web. It can only be used on one of the Ubuntu colors, shown on page 14.
 Never change any of the colours in the brandmark. For detailed colour specifications refer to page 14.

Ubuntu Brand Guidelines Exclusion zone The trademark 06

DEFINING THE EXCLUSION ZONE
The Ubuntu trademark must always have a clear area surrounding it, free from any other element.
To define this area, measure the height of the round and use half this measure to create the boundary of clear space around the trademark.

Ubuntu Brand Guidelines Surrounding space Circle of Friends 07

DEFINING THE EXCLUSION ZONE
The Circle of Friends, when used on its own, must always have a clear area surrounding it, free from any other element.
To define this area, measure the height of the round and use a quarter of this measure to create the boundary of clear space.

Ubuntu Brand Guidelines Minimum size and small use 08

MINIMUM SIZE
Standard version
The standard version of the trademark must never be used at a width less than 80mm, as shown above.
No @ version
Below the width of 80mm, the no registered trademark version must be used. It must never be used at a width less than 30mm.
Small use version
When it is necessary to use the trademark at a width less than 30mm, a small use version has been created. This version must never be used at a width less than 15mm.

Ubuntu Brand Guidelines Positional guides 09

CENTERING THE BRANDMARK
When centering the brandmark, it is important to maintain a visual balance of surrounding space.
Horizontal alignment
Align the mid-point between the 'v' and 'r' with the centre of the page/footer.
Vertical alignment
Position the brandmark so that the round sits on the same line as the page/footer.

Ubuntu Brand Guidelines Incorrect use 10

INCORRECT USE
Ensuring the correct application of the brandmark is paramount to the Ubuntu brand identity.
By following the guidelines on how to use them you will help to build a powerful and united identity for the Ubuntu brand.
Shown on this page are examples incorrect use.

YOU MUST NOT...

1. Change the spacing between the individual elements or characters.
2. Change the colour of the brandmark.
3. Change the colour of the Circle of Friends.
4. Change the arrangement of the elements.
5. Place the brandmark at an angle other than horizontal or vertical.
6. Change the proportion of the brandmark.
7. Place the brandmark on a non brand colour.

Ubuntu Brand Identity Guidelines Exceptional use brandmarks Stacked version 11

THE UBUNTU STACKED BRANDMARK
For exceptional circumstances, e.g. hardware stickers, a stacked version of the brandmark has been created.
Consistent use of the Ubuntu brandmark is essential in creating a vertical brand identity. The master brandmark is registered as a trademark and should never be altered, distorted or re-created in any way.

Ubuntu Brand Identity Guidelines Exceptional use brandmarks Stacked version 12

DEFINING THE EXCLUSION ZONE
The Ubuntu trademark must always have a clear area surrounding it, free from any other element.
To define this area, measure the height of the round and use a quarter of this measure to create the boundary of clear space around the trademark.

MINIMUM SIZE
Standard stacked version
The standard version of the brandmark must never be used at a width less than 71mm, as shown above.
No @ version
Below the width of 71mm, the no registered trademark version must be used. It must never be used at a width less than 30mm.

Ubuntu Brand Identity Guidelines Exceptional use brandmarks Vertical version 13

THE UBUNTU VERTICAL BRANDMARK
For exceptional circumstances, e.g. large vertical banners, a vertical version of the brandmark has been created.
The Circle of Friends within the vertical version of the brandmark always remains horizontal.
The master vertical brandmark is supplied as artwork, and should never be altered, distorted or re-created in any way.
To define this area, measure the height of the round and use half this measure to create the boundary of clear space around the brandmark.
Minimum size and small use
The same minimum size and small use rules apply as with the standard version of the brandmark. Refer to page 08 for details.

Ubuntu Brand Guidelines Colour palette 14

UBUNTU ORANGE
Pantone 1665
CMYK 100/100/0
