Services and support

Canonical is the leading global provider of Ubuntu services. Its Ubuntu Advantage subscription service includes specialist tools, dedicated support and expert advice to help you make the most of Ubuntu. Learn more at www.ubuntu.com/business

System requirements

Your server must have at least 128 MB of RAM and 1 GB of disk space. This 64-bit edition will run on AMD64 and Intel x64-based computers, including AMD Opteron and Intel EM64T Xeon. A 32-bit version of Ubuntu Server can be downloaded from www.ubuntu.com

Share Ubuntu, it's legal

'Ubuntu' is an ancient African word which means 'a shared humanity'. All of the software on this CD is legal to copy and share. If you know someone who would enjoy Ubuntu, please pass it on. That's the spirit of free and open-source software!

What is Ubuntu Server?

This is the lean, mean server version of Ubuntu, the world's favourite free software operating system. Ubuntu has been adopted as a trusted server platform by large and small organisations alike; some of the biggest websites are powered by Ubuntu. Whether you're deploying a fanless home server, or a fifty-thousand node rendering cluster, you're in good company with Ubuntu. It's easy to install, maintain and includes security updates free of charge.

Deploy common services such as web, email, file and database servers quickly; Ubuntu comes with the world's largest selection of pre-packaged free software ready-to-run. It also includes proven KVM virtualisation technology so you can run any guest operating system under Ubuntu on supported hardware.

Ubuntu is a leading cloud platform too: this CD includes everything you need to build your own EC2-compatible cloud infrastructure, or deploy applications to the public cloud with all major providers. The hybrid cloud is a reality today with Ubuntu.

If you need any help moving to Ubuntu then contact Canonical. We offer deployment, training and support services, along with Landscape, a systems management tool. Canonical helps many of the world's best-known organisations make the most of their Ubuntu Server deployments.

Visit www.ubuntu.com and www.canonical.com for more information.

Server 11.10

This CD includes software released for free public use under several licences. It is provided without warranty, even the implied warranty of merchantability, satisfaction or fitness for a particular use. See the licence included with each program for details. Source code for Ubuntu can be downloaded from archive.ubuntu.com. Ubuntu, the Ubuntu logo and Canonical are registered trademarks of Canonical Ltd. All other trademarks are the property of their respective owners.
