

Installing Ubuntu Server

Just boot your server from this CD and choose to install a standalone server, or to deploy multiple servers with MAAS. You can find more information at askubuntu.com or www.ubuntu.com/business

Why choose Ubuntu Server?

Ubuntu Server gives you the world's leading cloud infrastructure and is available as a certified guest on all the leading public clouds.

- Ubuntu Server 12.10 comes with 18 months' free security and maintenance updates.
- Ubuntu Server works on popular commodity hardware and is fully certified on servers from leading manufacturers.
- Use Metal-as-a-Service (MAAS) to provision multiple servers quickly and easily.
- Choose from the widest selection of server apps, tools and frameworks.
