Ubuntu Linux Install Fest
UK Campus
21, April 2007

Get together with the Kentucky Ubuntu Linux LoCo team for an **Install Fest**. These events are put together to give us the chance to get together with real folks like you to spread the ideas and functionality of free software.

What will you get out of this? For the price of **free**...

You get Ubuntu Linux installed either in place of your Windows installation or beside of it. You will be able to choose. You will have an opportunity to never worry about viruses and spyware. You will have the choice of many exciting and functional desktop environments.

Ubuntu Linux is a customizable, free, and powerful operating system. There are alternatives to all of your favorite Windows applications available, and for the most part already installed.

You have nothing to lose but an opportunity. Be there!

What: We want to do a free installation of the Ubuntu Linux operating system on your personal computer. Refreshments will be available, and the free software will flow freely!

What is Ubuntu?: Ubuntu is a community developed, linux-based operating system that is perfect for laptops, desktops and servers. It contains all the applications you need - a web browser, presentation, document and spreadsheet software, instant messaging and much more.

When: 21, April 2007 1 PM - 4 PM

Where: UK Campus

Room 207, Ralph G. Anderson Building

Who? Contact our representative Steve @ 270-217-1259 for general questions/directions to the event.
