Columbia, MD 21045

When

Saturday, July 21, 2007
10am - 3pm

Who

Sponsored by the Ubuntu Maryland Local Community Team

What is Ubuntu?

Ubuntu is an operating system consisting of free and open source software. With Ubuntu, you can surf the web, read email, create documents, spreadsheets, and more! You can choose from hundreds of free software packages and install them with just a few clicks.

Ubuntu is virtually virus-free and its built-in security features help to protect you and your sensitive data from spyware.

"Ubuntu" is an ancient African word that means "humanity to others." This Linux distribution brings the spirit of Ubuntu to the software world.

What to Bring

Please bring your computer or laptop, any handheld devices or PDAs that you plan to use with your computer, as well as any wireless card disks. You *do not* need to bring your monitor, keyboard, mouse, printer, or other peripherals, but please bring a note listing their manufacturer and model. **Please make a backup of all personal data prior to attending.**
