

# Introduction to Ubuntu

Please join Maryland's Ubuntu Local Community Team for an evening of demonstrations and discussion about Ubuntu Linux and how you can benefit from Free software.

Learn how Free software can be used for your everyday needs and beyond. Discover that not everyone suffers from the latest virus, spyware, malware or other random infection that causes your computer to slow down or worse, come to a halt.

Our team will be at the Central Branch of the Howard County Public Library on May 20<sup>th</sup> from 7-9pm.

All are welcome and there is no cost to attend.

Everyone will receive a free Ubuntu CD loaded with Free software.
