Setup Guide: UD Sidebar

Table of Contents

Installation

To install the module, I will assume you already followed the UD Theme installation guide. From the front page click "Administer."

In the "Site Building" section click "Modules."

You will then be looking at the modules page.
Scroll down to the bottom of the page to see the "Ubuntu Drupal" group of modules.

Select the "UD Release Sidebar" module and click "Save Configuration."

Configuration

Go to the "Administration" page.
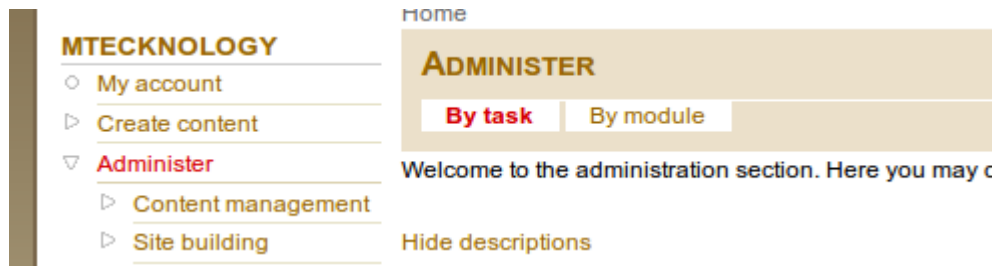

Click the "UD Sidebar Settings" link.
You will see the currently existing sidebar options. These are the defaults that are installed when the module is installed.

Configure the Block

To configure the block so id displays on your site, go to the "Administration" page and click the "Blocks" link in the "Site Building" section.

Site building
Control how your site looks and feels.

Blocks
Configure what block content appears in your site's sidebars and other regions.

Menus

Find the "Ubuntu Drupal Sidebar" block. Select the drop down box to the right of it that currently says "None" and select a region for it. For the example, we will use the "Left Sidebar" region.

Disabled

✛	Powered by Drupal	<none> ▼	configure
✛	Ubuntu Drupal Sidebar	<none> ▼	configure
You will see the module was moved into this section (region). You can use the handle to adjust its exact location.

Left sidebar

✛	Ubuntu Drupal Sidebar*	Left sidebar ▼	configure
✛	Launchpad Login Button	Left sidebar ▼	configure

Scroll down to the bottom and click "Save Configuration." After this saves, go to your front page.

Save blocks

You will now see the block content displayed where you assigned it.
